

## Word Wheel 1: true sight words

November 12, 2015

**The Verb Company**

- this word wheel for 'sight words' includes all common monosyllabic words of English that do not follow a pattern
- if a word is otherwise regular but has an empty letter, it is not included here (but see Word Wheel 2 and 3); so, **irregular** empty letter words are included here (e.g. could, should)
- based on Parts 1-5 of **Up the Ladder**
- excluded the following pairs: (1) (to) live vs. live (music); (2) wind (a clock) vs. wind (blowing); (3) bass (the fish) vs. bass (the musical instrument); and (4) (to) read vs. read (yesterday)
- the right side has grammatical words, the left content words (organized by linguistic category)
- right side, top to bottom: (1) articles (2) prepositions (3) auxiliary verbs (4) quantifiers (5) question words (6) interjections
- left side, top to bottom: (1) verbs (2) nouns (3) adjectives (note that some of the nouns can be verbs as well — break, ache etc.)
